# Find someone who...

can identify and describe the 3 sub-atomic particles.

- 1.
- 2.
- 3.

can describe an electron cloud and its relationship with the nucleus.

---

---

---

---

---

---

---

can properly illustrate an electron cloud model of an atom

can list the 5 states of matter

---

---

---

---

---

---

---

---

---

---

can provide an explanation of what quarks are and their significance.

---

---

---

---

---

---

---

---

---

---

---

Students must initial the answer they give you after you write it down.
